

Minibiography

Victor L. Yu, MD, is a Professor of Medicine at the University of Pittsburgh and Chief of the Infectious Disease section at the VA Medical Center, Pittsburgh, Pennsylvania. He majored in mathematics at Carleton College, earned his medical degree at the University of Minnesota, and performed his internship and residency at the University of Colorado and Stanford University. He was a postdoctoral fellow in infectious diseases at Stanford University. His research interests include Legionella infections, antimicrobial resistance, and medical informatics. He has published over 300 scientific papers, contributed chapters to over 60 books, and is editor-in-chief of 3 textbooks. He is also the editor of www.antimicrobe.org, a state-of-the-art website for antimicrobial agents and infectious diseases. A major accomplishment has been the 50 students and fellows he has mentored who are now active in research at academic positions throughout the world. Dr. Yu has accepted over 200 invited lectures and visiting professorships internationally. He has received numerous awards including these from the American Legion, the Health Research and Services Foundation, American Society for Microbiology, National Institutes of Health, the Federal Research Executive Board, and Australasia Infectious Disease Society. He was elected to Best Doctors in America for 1996-2004 (Woodward, White, Inc.). He is the recipient of the Emmanuel Wolinsky Award given by the Infectious Disease Society of America for the Best Original Article published in *Clinical Infectious Diseases* for 2003.
